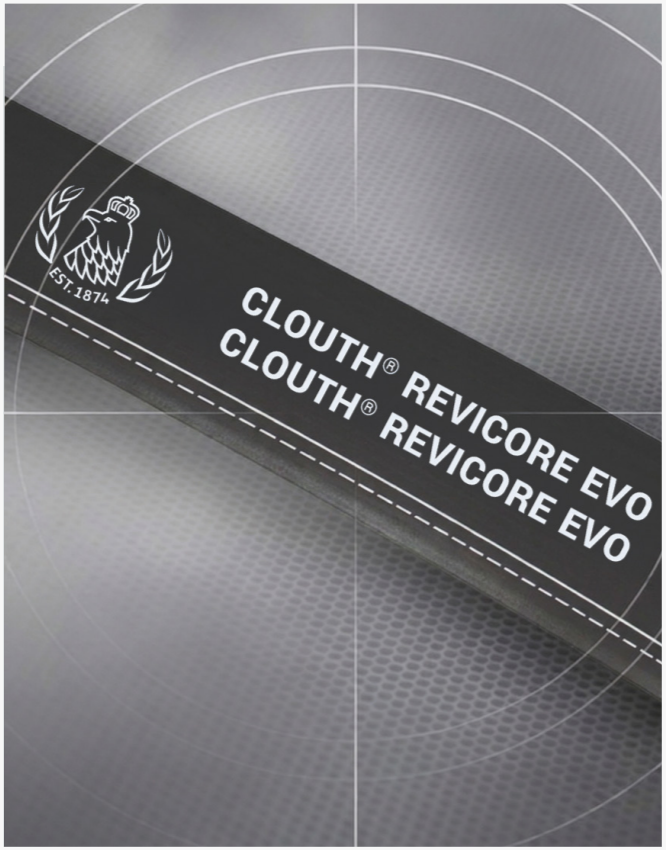
CLOUTH® REVICORE EVO.

The cost-effective choice for everyday production.



Versatile. Economical. Reliable.

Made from recycled glass-fiber composite material, CLOUTH® REVICORE EVO combines sustainable material technology with reliable process stability for everyday production.

Stable processes. Clean results.

Excellent flexibility ensures optimal adaptation to the roll surface and consistently clean results.

Reliable in everyday production.

Its excellent chemical resistance makes CLOUTH® REVICORE EVO a reliable solution for continuous production operations.

Cost-effective throughout its service life.

The well-balanced combination of performance, wear resistance and purchase price ensures economical processes and low operating costs in everyday use.
